LITERATURE REVIEW CHECKLIST

A comprehensive checklist to ensure your literature review meets academic standards and demonstrates thorough research.

R	esearch Question & Scope
	Clear research question or thesis identified Scope of review defined (time period, geographic area, specific aspects) Key concepts and terminology clearly defined Search parameters established (databases, journals, keywords) Inclusion/exclusion criteria determined
So	ource Selection
	Minimum of 15-20 scholarly sources identified (adjust based on paper length) 80%+ sources are peer-reviewed academic journals Sources are current and relevant (typically within last 10 years, unless seminal works Mix of primary and secondary sources included Diverse perspectives and viewpoints represented Seminal/foundational works in the field included
	ORGANIZATION & STRUCTURE
	Clear organizational pattern chosen: Chronological (by publication date) Thematic (by topic/theme) Methodological (by research methods) Theoretical (by theoretical framework) Logical flow from one section to next Smooth transitions between ideas and sources Clear subheadings that guide the reader
C	ontent Structure
	Introduction establishes purpose and scope Body synthesizes sources (not just summarizes) Patterns, themes, and trends identified Gaps in existing research highlighted

Synthesis vs. Summary

	Sources are synthesized, not just listed or summarized
	Multiple sources discussed together under common themes
П	Critical analysis provided (strengths, weaknesses, limitations)
-	Your own analytical voice is present
-	Connections between sources explicitly stated
	NOT organized as "Source A says Source B says Source C says"
	101 organization composition, composition
Cri	itical Analysis
П	Methodological strengths and weaknesses evaluated
П	Research findings critically examined
П	Theoretical frameworks assessed
П	Contradictory findings acknowledged and discussed
	Research gaps and limitations identified
	Future research directions suggested
Aca	ademic Writing Style
П	Objective, formal academic tone maintained
	Third person used (no "I" or "we" unless discipline-appropriate)
	Present tense used for discussing sources
-	Clear, concise sentences
	Technical terminology defined when introduced
	Free from grammatical and spelling errors

Need Help?

If you're struggling with any aspect of your literature review: - Consult your professor or advisor - Visit your university's writing center - Review exemplar literature reviews in your field - Seek guidance from librarians for source selection

Remember: A strong literature review demonstrates not just what you've read, but how you've synthesized and critically analyzed existing research to position your own study.
